15602 Northwest Boulevard, Ste. H, Robstown, TX 78380

Wednesday February 17, 2021 1:20PM

River Acres Water Supply (RAWS) Members,

For immediate release:

We have been advised by the Texas Commission on Environmental Quality (TCEQ) that the water distribution system **MUST BEGIN a WATER BOIL NOTICE**. Accordingly, you should boil any water that you are using for human consumption cooking, washing your dishes, etc.

Our water supplier Nueces Water and Improvement District #3 is also running low on water in their treatment facility. They will be taking their plan off-line and **WILL NOT BE ABLE TO PROVIDE WATER FOR THE NEXT 10 to 12 HOURS**.

Accordingly, please use water sparingly and **DO NOT WASH CLOTHES or DISHES**. Please refrain from showering or taking baths if possible.

The RAWS ground storage tank and elevated storage tanks are full but will be depleted rapidly if we do not consciously conserve the water in the system.

WE DO NOT WANT TO DEplete THE SYSTEM

Please tune in to the local television stations, KRIS, KZTV and KIII for updates.

Other updates will be posted on the Neighborhood App. as they become available.

Please call or come by the office if you have any questions or concerns. 361-387-2614.
